IMPORTANT NOTICE TO ALL RESIDENTS

Seekonk Street from Stop River Road to Campbell Street:

Columbia Gas of Massachusetts is planning to install new natural gas main on Seekonk Street from the intersection of Stop River Road and continue to the intersection of Campbell Street. This natural gas installation/extension will begin on Stop River Road and continue to Campbell Street. This would allow residents along this newly installed gas main to connect to natural gas service and SAVE on home heating costs annually. Please visit ColumbiaGasMA.com/Convert for more information and to calculate your potential savings.

If you are interested please contact our New Business Rep, Kara Carbone at 1-508-208-6162, she will guide you through the next steps. It is important that you act now.

Work in your neighborhood is scheduled to begin on Monday September 17. Construction will primarily take place from Monday through Saturday, between 7:00 a.m. and 5:30 p.m. Columbia Gas and its contractors can be identified by their marked vehicles. In addition, all company employees and contractors carry photo identification.

The construction process will require temporary excavations of roadways, sidewalks, and possibly portions of driveways and/or lawns. Road closures may be required for a short period of time within the construction area. Every effort will be made to expedite this work and keep a traffic lane open for Safety Vehicles, School Buses and Residents who live in the area. Police details will be present during construction to assist with traffic control.

Our crews will work to minimize potential inconveniences to you and your neighbors. At the completion of the work, we will restore all properties affected by the construction as close to their pre-construction condition as possible. As with any construction project, full restoration of some property may take time due to weather or seasonal conditions outside of our control.

Thank you for your patience during this process.
