NOTICE TO RESIDENTS
GROVE STREET

Sections of your street have been scheduled for Milling and Paving. Milling and will begin this Friday the 21st. Although the entire street will not be paved, we will mill and repave the following sections:

- Grove Street from Strawberry Lane to Trailside Way
- Grove Street from #84 Grove Street to Park Street

Sorry for the short notice but we would like to take advantage of this schedule for fear that it may be months before the Contractor becomes available again.

The milling process will require large pieces of heavy equipment and will consume most of the street during the construction hours of 7:00 am - 4:00 pm. on Friday. Milling should take only one day. After the street is milled and swept, normal two way traffic will continue on the rough surface.

The Paving Contractor “PJ Keating”, has scheduled paving within a week or two of “Milling”. The paving should only take one day as well.

The paving process like the milling process will move at a slow walking pace. Each resident should be able to calculate when the paver will be approaching your driveway entrance. Give yourself enough time to leave.

Every effort will be made to expedite this work and keep a traffic lane open for Safety Vehicles and Residents who live in the area. Police details will be present during the milling and paving process to assist with traffic control.

Thank you for you cooperation and patience through this process!
NOTICE TO RESIDENTS

CLEVELAND STREET

A Section of your streets has been scheduled for Milling and Paving. Milling and will begin next Monday June 24th, with paving to follow as noted below. Cleveland Street will be “Milled and Paved” as follows:

Cleveland Street: from Winston Rd. to Seekonk St

Sorry for the short notice but we would like to take advantage of this schedule for fear that it may be months before the Contractor becomes available again.

The milling process will require large pieces of heavy equipment and will consume most of the street during the construction hours of 7:00 am - 4:00 pm on Monday. Milling should take only one day. After the street is milled and swept, normal two way traffic will continue on the rough surface.

The Paving Contractor “PJ Keating”, has scheduled paving within a week or two of “Milling”. The paving should only take one day as well.

The paving process like the milling process will move at a slow walking pace. Each resident should be able to calculate when the paver will be approaching your driveway entrance. Give yourself enough time to leave.

Every effort will be made to expedite this work and keep a traffic lane open for Safety Vehicles and Residents who live in the area. Police details will be present during the milling and paving process to assist with traffic control.

Thank you for you cooperation and patience through this process!
ABOUT THE MILLING PROCESS

Milling is completed with a cold planning machine. This large piece of equipment grinds the existing pavement, removing 1.5” of asphalt, resulting in a somewhat rough but even surface. The street can be opened to traffic almost immediately, thereafter. See diagram enclosed
