Plumbing Permit must be obtained before any work is started.

Absolutely no cross connections between Town water and existing well systems.

Existing well systems cannot be connected to sill cocks for lawn watering until all water is tested and acceptable to the Board of Health.

1” type “L” copper shall be connected with a shut off valve, at the house side of the meter yoke to the location where the well piping is connected to the house main.

Hose connection vacuum breakers shall protect all sill cocks of town water or well water.

All piping from the well systems to the sill cocks shall be color coded with a 3” wide bank of yellow paint at 10’ intervals and at the walls.

**Jim Murray
Plumbing Inspector**
